

Post-Study Survey and Interview

What was the most frustrating part of writing documentation for your Jupyter Notebook? [Both Groups]

What could be the ideal features for a tool that can aid you in developing the documentation for a Jupyter Notebook? [Control Group]

What aspects of the tool you were using to generate information made this process easier? What aspects of the tool you used did you find confusing or unnecessary? [Experimental Group]

How would you rate the tool's usefulness for documentation from 1 (Least Useful) to 5 (Most Useful), and why? [Experimental Group]

Evaluate each of these features on 2 attributes on a 5 point Likert scale - Necessary/Unnecessary, Confusing/Easy to use. Please briefly explain your rating. [Experimental Group]

Feature 1: Exporting the generated documentation to markdown.

Feature 2: Adding a section present in the Model Card to the Jupyter Notebook.

Feature 3: Adding a new section to the Notebook and the Model Card.

Feature 4: Navigating to the cell in the Jupyter Notebook from the Model Card.

Feature 5: Marking a code cell as a relevant Model Card section.

Feature 6: Presenting the description and examples of model card sections in the tool.

Did you complete all the model card sections that were predefined by the tool? If not, why? [Both Groups]

Did you add any new section that you came up on your own to the documentation? If yes, why? [Both Groups]

Are you confident and satisfied with the documentation you produced in this short period of time? [Both Groups]

- Not at all satisfied
- Slightly satisfied
- Moderately satisfied
- Very satisfied
- Extremely satisfied

What do you think would help in improving the documentation? [Both Groups]

- More time to develop the documentation
- Collaboration with others
- Multiple iterations with review
- Others

How likely is it that you will continue to use the plugin in your work? [Experimental Group]

- Extremely unlikely
- Unlikely
- Neutral
- Likely
- Extremely likely

If it's not likely that you will continue to use the tool, is there any feature that will probably make you change your answer? [Experimental Group]

Any other comments or feedback on the tool or the study? [Both Groups]
