Hi everyone! We're researchers at McGill University studying the engineering practice for machine learning model development. If **you use Jupyter for developing your machine learning models**, our study might interest you.

We are recruiting participants for a study about understanding and supporting the documentation practices for machine learning models. The study will consist of a brief pre-study survey, a remote lab study during which you will be asked to perform two tasks related to machine learning model development in the Jupyter Lab environment, and a post-study interview. The lab study will take around 60 minutes and will take place on Microsoft Teams. You will be given an Amazon gift card worth \$15 CAD as our appreciation of your support.

If you are interested in participating, please fill out [this form](#) and mention your availability between now and December 29th, 2021. Thank you in advance for your consideration!

Feel free to contact Avinash Bhat at McGill University (avinash.bhat@mail.mcgill.ca) or his supervisor Jin Guo (jguo@cs.mcgill.ca) for any questions that you might have.
